Client:

Borivoj Petrovic Boyan as an individual have an idea about developing a website which assists the end user to develop the website based on the templates generated in this site.

Challenge:

Boyan as an individual wants to make his idea into reality of giving easy option to end users to develop a website based on the existing templates in his site. Started implementing different ideas like integrating Payment gateway, Google maps and Social Media networking, Email Integration and auto responders with ability to give extra space to customers.

Client needed a reliable software development partner with strong portal solution and with web based platform expertise to develop and maintain a highly efficient and user-friendly web-based system.

Solution:

We set up a dedicated offshore team to develop the website generator site which gives high quality and feasible templates to the customers who can easily design and

INNOVATE AND EXCEL

Apr 2010 – Jul 2011

Scale:

2 man years

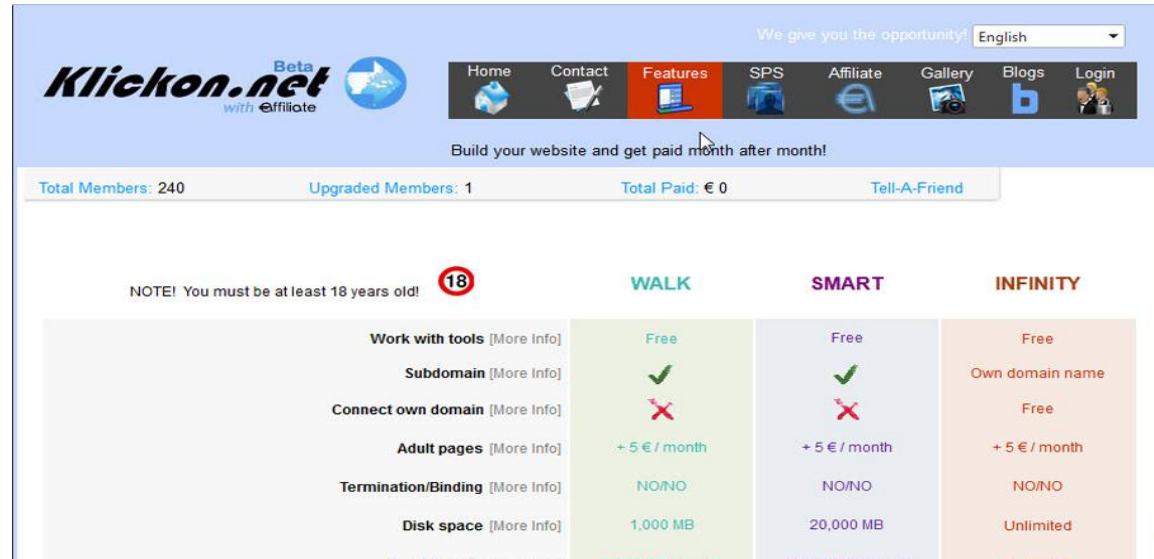

About NCPL:

Since 2005, NCPL an ISO 9001:2008 certified company has been building great teams to develop, migrate or maintain complex, and mission-critical software.

We have mastered the dynamics of distributed software development, mobile technology, developing a workflow and methodology that improves our performance on every key customer metric, including product quality, time to market, budget adherence, project transparency and issue resolution. That's why over 95% of our clients come back for more.

NCPL – Innovate and Excel

develop the customized website. This website generator should be easily integrated with paypal and with email server which auto responds to customers by allocating more space in the server.

Different packages were designed for the end users based on the payments made to the site to use the templates and sub pages.

To ensure a smooth transition to the new system, our ODC team continues to provide our client with ongoing support and maintenance.

- We set up a dedicated offshore development centre

Result:

NCPL's collaboration enabled klickon.net to gain status as a leading online website generator by offering a complete solution with all features those are needed to design website that include email integration and auto responders along with Google maps integration.
